DECLARATION IN SUPPORT OF
REQUEST FOR ACCEPTANCE OF ADDITIONAL FEES
FOR ERRONEOUSLY CLAIMING SMALL ENTITY STATUS (37 CFR §1.28(C))

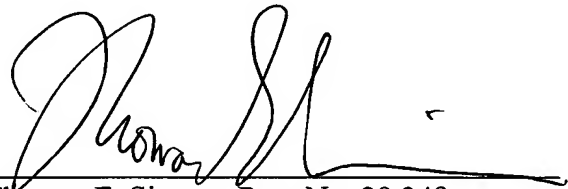

I am the attorney of record in this case. I have been licensed to practice before the United States Patent and Trademark Office since 1978. I am in good standing before the United States Patent and Trademark Office. I make this declaration to support the acceptance of an additional filing fee in this case.

The initial establishment of the applicant/ assignee as a small entity was made in good faith, but was erroneous. At the time the application was filed (Serial No. 10/628,185, filed July 28, 2003), the agent preparing the application asked the representative of the assignee company whether it qualified as a small entity. The assignee's representative did not understand that employees of affiliates and licensees were to be included in the total number of employees. required the filing of a fresh declaration of inventorship and also noted that a small entity filing fee had been paid on initial filing. The undersigned conducted an investigation and discovered

in late December 2003 that the assignee company (Mainland Laboratory, Ltd.) had a license agreement with an entity which did not qualify as a small entity; and, thus, the application did not qualify for small entity status. This mistake was made without any intent to deceive the United States Patent and Trademark Office.

I therefore request that the United States Patent and Trademark Office accept the additional \$500.00 filing fees and surcharges.

I hereby declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code and that such willful false statements may jeopardize the validity of the application or any patent issued thereon.
